RELEASE THE BEAST

VMAC designed the Raptair for one reason: It was the right thing to do.

Years of product development, industry experience and feedback from our greatest critics, our customers, has culminated in the design of the RAPT AIR60 – Diesel Driven Air Compressor. Created specifically for the mobile market, the RAPT AIR is a compact, powerful air compressor that delivers 60 CFM at 100 psi.

Worried about noise, fuel consumption and emissions? VMAC has designed the RAPT AIR with solutions!

Tired of hearing an engine run while you aren't using it? The RAPT AIR monitors your air usage and turns itself off when you are doing work without air tools, saving on fuel costs as well as reducing your carbon footprint.

Ready to get back to work with your compressed air needs? The advanced control systems automatically recognizes you are using air and re-starts the engine and compressor, without you having to do anything but use your equipment.

Knowing you are carrying more equipment on your truck and need any extra payload you can get, VMAC has used expertise gained over years of UNDERHOOD compressor design to ensure the RAPT AIR is as small and light as possible while still delivering the performance you need and expect from a VMAC compressor system.

COMMON TOOLS	AIR REQUIRED
1" IMPACT GUN	30 - 50 CFM
3/8" - 5/8" DRILL	12 - 35 CFM
60LB PAVING BREAKER	12 - 48 CFM
4" HORIZONTAL GRINDER	20 - 60 CFM

The RAPT AIR: a new compressor designed for the changing face of your workplace. Easy to operate advanced controls to make your life easier.

- AIR ON DEMAND (THE ENGINE TOO!)
- TRUE 60 CFM
- COLD AND HOT WEATHER CONTROL AND PROTECTION
- KUBOTA DIESEL ENGINE

The VMAC Rotary Screw Compressor delivers air on-demand up to 100% duty cycle and packs the muscle to power up to a 60LB jackhammer or a 1" impact wrench. VMAC stands behind its products. North American VMAC Dealer surveys consistently rank VMAC as a top supplier delivering prompt and professional customer and technical support. A 2 year warranty comes standard on every VMAC air system.

COMPACT. POWERFUL. THE WAY MOBILE COMPRESSORS ARE MEANT TO BE.

SPECIFICATIONS*

The RAPTAIR60 utilizes VMAC's advanced compressor control system that is smart enough to turn the engine off when you're not using air, and automatically turn the engine back on when you use air again. The RAPTAIR60 is a complete stand-alone air compressor system.

AIR COMPRESSOR	Direct driven, 100% duty cycle. VMAC oil-injected rotary screw air compressor with 500 hr service interval
AIR FLOW	True 60 CFM @ 100 psi (150 psi Max)
ENGINE	KUBOTA Diesel Tier 4 final compliant
WEIGHT (WET)	Approximately 450 LBS (204 KG)
DIMENSIONS	18" (w) x 34.5" (l) x 28" (h) - with fuel tank add 4.6" to length
FUEL TANK	Optional 7 Gal with fuel gauge and low fuel shut off sensor
COOLERS (ENGINE & COMPRESSOR)	Integrated
THROTTLE CONTROL	2-speed throttle, responds to air demand
COLD CLIMATE KIT	Optional 120V, tested to -40°C with optional 12V inverter for vehicle tie-in
CONTROLLER	Easy to use digital control, with user adjustable parameters Remote mountable standard
BATTERY	Internal with integrated jump start/vehicle tie-in point
FUEL SAVING	Standard adjustable automatic shutdown with cold weather automated start up

ACCESSORIES

**12V DC to 120V AC 1000W
Pure Sine Wave Inverter**
Designed to power your
Raptair with cold climate kit

Inverter Remote Kit
Remote panel for the Inverter

**Raptair Remote Fuel
Priming Pump**
12V diesel fuel priming pump
to tie into a remote fuel tank

Raptair Fuel Tank
7 gallon fuel tank option
to be attached directly to
the back of the Raptair

" The Raptair was a pleasure to install. Easy to mount, easy to attach the fuel tank, and the best part is the straight-forward start-up. You turn it to on, it does its system check and then you press the enter button. No glow plugs or complicated procedures to follow."

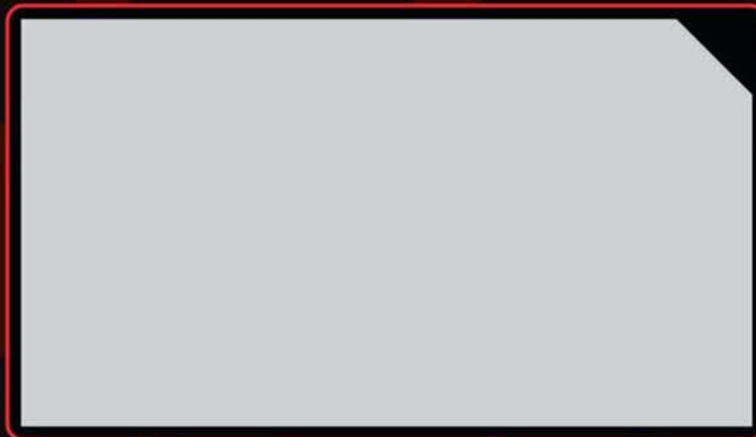

- Joey Stagl, Installer
Dickinson Truck Equipment
North Dakota

" It delivers good power, and it's basically unstoppable! Turn it on, start it, do your job, shut it off - it's a no-brainer. You can't compare it to a reciprocating compressor because they're like apples and oranges - completely different. The Raptair is way more efficient. I get twice the work done in half the time. They call it 'The Beast', but I don't know...if it had legs I'd probably be out of work!"

- Kade Van Shaik
Highway Tire, Nanaimo
British Columbia

" The Raptair is awesome! From its sharp appearance to the huge volume of air it produces I can't say enough good things about it. It's quiet, has incredible output, and its advanced features make it a pleasure to operate. I'll be suggesting this compressor to all my customers."

- Kurt Wanner, Owner
Dickinson Truck Equipment
